

CANOES

Paluski has designed 2 canoes styles that will meet almost all paddling needs. The Adirondack design lets the beginner or occasional paddler stay dry and feel comfortable on rivers and lakes. The Fastwater meets the needs of the more experienced paddler who plans to trip through moving water as well as open water conditions.

Recreational Canoes

[14' Adirondack](#)

Single keel hull is wide, stable and deep.

Length: 14'
Width: 39"
Weight: 68 lbs
Capacity: 700 lbs

[12.6 Adirondack](#)

Same hull and features as the 14' Adirondack with the added convenience of square stern designed to safely handle a small trolling motor.

Length: 12'6"
Width: 39"
Weight: 70 lbs
Capacity: 700 lbs

Outfitter Canoe

[Fastwater 16](#)

A stable and extremely deep all purpose tripping canoe based on the 'prospector' design.

Length: 16'9"
Width: 36"
Weight: 65 lbs
Capacity: 700 lbs
