

ROWING SHELL

Manufacturing a recreational rowing shell is where Paluski Boats started and that tradition continues today. Rowing is a great sport for non stressful exercise and the sensation of speed and grace is impossible to achieve in any other small boat.

Touring Single
rowing shells

Length: 19'- 6"
Width: 20"
Depth: na
Weight: 65 lbs
Capacity: 300 lbs

Note: Oars not included

The Touring Single is wider than a traditional racing shell making it more stable and easier to row, particularly for someone new to the sport or the occasional rower. The Touring Single is manufactured from a high quality, lightweight fibreglass laminate. The riggers, adjustable footstops and sliding seat have been engineered into a single drop-in rowing unit which is then attached to top deck. The drop in rowing unit can be easily removed from the top deck of the shell and can be easily stored or transported.
